DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by U.S. Patent No. 6,745,137 to Krishnamachari et al..

Regarding claim 1, Krishnamachari et al. disclose a method of correcting loss and dispersion distortions in cable measurements including:

measuring cable in a frequency domain to obtain a reflected response of a transmitted signal (column 9 lines 35-39);

collecting a series of fractional sinusoid components of said reflected response from predetermined points along said cable to provide a superimposed function (column 10 lines 63-67);

dividing said superimposed function by a sent signal function to provide a normalized function (column 13 lines 43-47); and

extracting from the normalized function the fractional sinusoid components by calculating a real value at each of said predetermined points thereby removing attenuation distortion and dispersion distortion (column 12 lines 30-34).

Regarding claim 2, Krishnamachari et al. disclose displaying a plot of said extracted fractional sinusoid components (column 14 lines 19-23).

Application/Control Number: 10/822,965

Art Unit: 2858

Regarding claim 3, Krishnamachari et al. disclose predetermined points along said cable

are determined in accordance with the period of a maximum probing frequency (column 11 lines

1-15).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to John Teresinski whose telephone number is (571) 272-2235. The

examiner can normally be reached on M-F 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Eddie Lefkowitz can be reached on (571) 272-2180. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
